#### 4. Definitions

The meanings of terms used in this policy are as follows.

(1) "Green product" is a product in accordance with Article 2 (5) of the "Framework Act on Low Carbon, Green Growth" and the relevant items for each certification are as follows.

A. Eco-label certified items: 165 product groups including office equipment, home appliances, and daily necessities

B. Low-carbon products: All products except medical devices, pharmaceuticals, primary agricultural, livestock and livestock products and forest products.

C. Excellent recycling (GR) certification: 11 fields including waste paper, waste rubber, waste plastic, and waste wood

(2) Environment-related certification products: Products with environmental certification marks or certificates from domestic and overseas certification bodies (public / private)

(3) "Green purchase" refers to the action of consumers who consider the environment and economy together by purchasing green products that are harmless to the human body and have little impact on the environment in the entire product process, including raw material collection, manufacturing, distribution, use, disposal, and recycling. In the case of a company, green procurement refers to a business activity that evaluates the environmental characteristics at the procurement stage for raw and subsidiary materials and operates the company's purchase contract and supply chain management in an environmentally friendly manner.

(5) "Purchaser" refers to a person who has been delegated the purchase task according to the purchase-related regulations, and complies with Article 5 of the Purchasing Management Rules.

(6) "Purchase team" refers to the department that establishes and operates a purchasing business system to prevent purchase risks in advance and respond systematically through purchasing business monitoring.

#### 5. Basic Principles of Green Purchase

(1) The purchaser shall perform green purchasing business in compliance with the company's environmental management philosophy and purchasing regulations.

(2) The purchaser shall continuously conduct improvement activities to discover eco-friendly products and reduce environmental impact in order to expand green purchases for environmental conservation and natural resource conservation.

(3) The purchaser shall secure a group of suppliers for the stable supply of the eco-friendly products they wish to purchase and endeavor to purchase the eco-friendly products first if possible.

(4) The purchaser shall fulfill the corporate social responsibilities by purchasing and increasing consumption of green products.

#### 6. Green purchasing business scope

(1) The Purchase Team's green purchasing tasks are as follows

A. The purchase team sets standards for eco-friendly products and provides priority to eco-friendly products when other departments request to purchase products.

B. The purchase team gives preference to eco-friendly products in addition to quality and price when purchasing products.

C. Purchase team guides suppliers on green purchasing guidelines and discovers eco-friendly products.

D. The purchase team manages the purchasing performance of eco-friendly products.

(2) The purchase team manages this standard and evaluates the presence or absence of environmental certification marks or certificates for eco-friendly products and the environmental control system when evaluating suppliers, and imposes additional points on the certificate holder.

## 7. Supplier's Responsibilities

(1) The supplier must present data proving that the product is an eco-friendly product such as an environment-related certification mark or certificate when contracting for the product.

(2) The supplier shall notify Taihan Cable & Solution Co., Ltd when major environmental information of the supplied goods is changed after the contract for the goods.

(3) The supplier shall endeavor to reduce environmental impacts and establish a management system in the manufacture of supplied products.

(4) The supplier shall provide other necessary matters for green purchase requested by Taihan Cable & Solution Co.,Ltd.

## 8. Support for the Supplier

The company may provide the following support to suppliers who actively cooperate with the company's green purchasing policy.

A. Execution of long-term contract

B. Technical support to reduce environmental impact of supplied products

C. Preferred application of education and advice related to green purchasing and environmental management activities

D. Other matters deemed necessary by the person in charge of purchase
